

REMARKS

Applicants respectfully request reconsideration of this application as amended. Claims 19, 23, 26, 41, 61, 62 and 67 have been amended to present the claims in better form for allowance and for possible consideration on appeal. Applicants respectfully request the Examiner to accept the proposed amendments. Claims 1-18, 29-40 and 46-58 have previously been cancelled without prejudice. Therefore, claims 19-28, 41-45 and 59-76 are now are presented for examination.

35 U.S.C. § 103 Rejection

Claims 19-28, 41-45 and 59-76 stand rejected under 35 U.S.C. §103(a), as being unpatentable over Kernz, U.S. Patent No. 6,366,899 (“Kernz”) in view of Odom et al. U.S Patent No. 6,058,379 (“Odom”).

As an initial matter, Applicants respectfully submit that Odom does not add to Kernz any of the limitations missing from Kernz. For example, Kernz, does not teach or reasonably suggest retrieving thumbnail images associated with items for sale . . . from a plurality of sites, wherein the retrieving of the images is performed utilizing user-supplied information including user-specified locations of the plurality of sites, as recited by claim 19. At best, Kernz discloses allowing “the user [to] *select a coin for view*” from a *pre-compiled* “Coin Image Compilation” consisting of “a list of coins, description, grade, and price . . . [and] may additionally include thumbnails of each of the coins” (col. 8, lines 36-43; emphasis provided).

Odom discloses “*classification and categorization of items . . . to enable various search techniques*” (col. 2, lines 49-51; see col. 6, lines 7-8; emphasis provided).

Furthermore, Odom discloses extracting “*information* from [a] remote web page . . . [t]he

information that is *required to be extracted* is information that is *sufficient to allow for an exchange to take place*” (claim 6. col. 9, lines 18-29; emphasis provided). However, Odom’s extraction of information is not the same as retrieving thumbnail images associated with items for sale . . . from a plurality of sites, wherein the retrieving of the images is performed utilizing user-supplied information including user-specified locations of the plurality of sites, as recited by claim 19.

Kernz and Odom, neither individually nor when combined, teach or reasonably suggest retrieving thumbnail images associated with items for sale . . . from a plurality of sites, wherein the retrieving of the images is performed utilizing user-supplied information including user-specified locations of the plurality of sites, as recited by claim 19. Accordingly, Applicants respectfully request the withdrawal of the rejection of claim 19 and its dependent claims.

With regard to claims 23, 26, 41, 61, 62 and 67, they contain limitations similar to those of claim 19. Accordingly, Applicants respectfully request the withdrawal of the rejection of claims 23, 26, 41, 61, 62 and 67 and their dependent claims.

Conclusion

In light of the foregoing, reconsideration and allowance of the claims is hereby earnestly requested.
